AIRBOSS TRAILER & SKID SYSTEMS

Meet the RynoWorx® AirBoss, a revolution in sealer spraying. AirBoss units are designed for precise application of asphalt emulsion and coal tar sealers. Delivered fully assembled, the AirBoss prioritizes quality, simplicity, and performance, redefining the sealcoating experience. Achieve professional results with the RynoWorx® AirBoss, your ultimate asphalt sealer spray system.

LEARN MORE

FEATURES & BENEFITS

AirBoss 750 Extended Trailer System pictured.
Truck and equipment shown on the Storage Deck are not included.

LARGEST IN-CLASS ENGINE AND COMPRESSOR CFM

Get more done in less time with the RynoWorx® Industrial Compressor.

- 14 HP (429 cc) Kohler engine*
- 30 gallon compressor*
- 28 CFM @ 90 psi*
- Electric start
- Built-in hour meter
- Dual regulator

*Best in class feature.

2 RYNOWORX AIRBOSS

LOCKABLE STORAGE, BRUSH BOXES, AND SPRAY WAND HOLDER

Carry more tools to your job site and keep your stuff safe.

- Large, secure storage
- One key for both boxes
- Keep your brushes from drying out
- Keep your spray wand tips damp and your trailer deck clean
- Tool boxes strategically placed to maximize deck space and act as steps for easy access to top of tank lid/manway

LARGEST IN-CLASS STORAGE DECK WITH NINE TIE DOWNS

Bring more equipment to the job site and keep it securely fastened while traveling. By strategically placing our compressor, tool box, brush box, and water tanks we're able to maximize deck space and functionality.

- 80" x 67" deck (37.2 sq ft)*
- Largest in-class ramp: 72" x 38"*
- Nine integrated 'D-Rings' allow you to independently secure multiple pieces of equipment*
- Slip resistant, checker plate steel deck
- Heavy duty, removable railings

EASY ACCESS FEATURES

Get up and down, quickly load equipment, and access all aspects of your AirBoss with integrated steps, grab rails, spring assist ramp, and oversized manway.

1. Effortlessly load sealer and sand into the top of the tank.
2. Integrated steps throughout the perimeter of your trailer make it easier for you to access your deck, compressor and top of your tank.
3. More flexibility to load larger equipment onto storage deck.
4. Easily enter and exit the tank with the oversized manway.

Equipment shown on the Storage Deck is not included.

PRESSURE ADJUSTABLE SURGE ARRESTOR TANK

Fine-tune your spraying quality with the industries best adjustable dampening system.

- Only in-class adjustable surge tank
- Quickly increase or lower operating tank pressure to minimize 'pulses' in your spray wand
- Pressure can be adjusted between 0-150 psi
- Industry standard Schrader valve

FILTER REGULATOR LUBRICATOR (FRL)

- **The only in-class FRL.**
- Adding a FRL in close proximity to the power tool will ensure the required airflow pressure, as well as good air quality by reducing the risk of moisture and dust in the air line. The FRL also helps maintain your air lines and pneumatic tools by providing lubrication.
- RynoWorx® units also come equipped with an over-pressure relief valve to prevent your crew from accidentally sending too much air pressure to your pump.

OTHER CLASS-LEADING TRAILER FEATURES

- 60 gallons of water storage*
- Dual 7225 LBS axles*
- 15,600 LBS GVWR*
- Rear tow ball receiver for future spray bar mounting*
- Sealed LED lights never require bulb changes

*Best in class feature.

CRACK FILL MELTER APPLICATORS

RynoWorx® Crack Fill Applicators are safe, reliable, and efficient. Capable of melting and applying up to 4800 feet per day, they feature innovations like the RynoValve™, adjustable controls, and on-the-fly agitation. The PRO & ELITE models offer up to 50% less fuel consumption. Whether you choose the standard RY10MA or the advanced RY10MA-Elite, you're investing in industry-leading pavement maintenance equipment.

LEARN MORE

**BEST-IN-CLASS
ENTRY LEVEL**

RY10MA-V3 BASE MODEL

The RY10MA-V3 was designed to be the most efficient, safe, reliable and easy-to-use torch fired crack fill machine. Contractors can melt and apply up to 400 feet per hour; 3,200 feet per day and features cutting edge innovations like the RynoValve™ and latching lid.

RY10MA-V3 WITH ERGO KIT

The RY10MA-V3 with Ergo Kit offers adjustable handlebars ranging from 35" to 42" to optimize valve squeeze distance and spring tension, reducing operator fatigue. Its side-by-side controls feature on-the-fly agitation, allowing operators to manage agitation, flow, material application, and temperature adjustments without leaving the operating position.

**BEST-IN-CLASS
MID LEVEL**

RY10MA-PRO-V4

The RY10MA-PRO-V4 Professional Crack Fill Melter Applicator's patented design uses up to 50% less fuel than traditional melter applicators. It also features cutting edge innovations like the RynoValve™, Adjustable Controls, and on-the-fly agitation. Apply up to 4,800 feet of crack filler per day.

RY10MA-ELITE

The RY10MA-Elite is the newest and most advanced melter-applier available today. We built upon proven technology from earlier versions of the RY10MA-PRO but added many new features including RynoValve™, RynoDash™, Adjustable Controls as well as dozens of major general enhancements.

FEATURES & BENEFITS

INCREASED PRODUCTIVITY

- Melts crack sealant faster than torch-fired models – apply up to 4,800 feet of crack filler per day.
- **RynoValve™** requires virtually no preheating time and is ready to use as soon as you have hot sealant in the kettle, saving you time between jobs.

EVEN MORE RELIABLE

- The enclosed burner design is shielded from the elements and virtually eliminates flame-outs caused by wind, which are common to torch-fired models.
- Two solid front casters allow the operator to maneuver over slanted surfaces with increased stability.

EASIER TO OPERATE

- **RynoDash™** allows you to easily ignite and monitor kettle temperatures from the comfort and convenience of the operator position.
- Side-by-side agitation, valve & band controls allow for continuous material agitation while you apply and spread sealant.

SAFE AND COMFORTABLE

- Fully equipped with CSA / UL approved regulator and fuel lines provide precise control over fuel flow and kettle temperature.
- Handlebars are adjustable from 35" - 42" – optimize valve squeeze distance and spring tensions to reduce operator fatigue.

INFRARED HEATERS

Rynoworx® Infrared Asphalt Heaters will bring distressed asphalt back to life. Infrared technology allows you to heat up and soften damaged areas so that they can be re-worked and compacted to appear brand new. RynoLink caster assemblies allow multiple heaters to be connected together for larger work areas. In as little as 8 minutes this heater will have the asphalt brought to its original mixing temperature, allowing for effective and cost-efficient repairs. You'll now be able to spend minimal time repairing potholes, bird baths, cracks, seams, and other surface imperfections on both new and used asphalt.

LEARN MORE

FEATURES & BENEFITS

PRODUCTIVE

- Eliminate trips to purchase new asphalt and dispose of old damaged asphalt by simply re-heating and re-working the affected areas.
- The Mini Infrared Heater has one of the lowest operating costs on the market.

RELIABLE

- Optional wind skirts contain heat, and ensure that your Mini Infrared Heater will not be affected by weather conditions.
- Easily replaceable heater cartridge.

SAFETY BUILT-IN

- Adjustable regulator with built-in pressure gauge allows for safe and precise control of fuel flow and heater temperature.
- Infrared heater technology replaces the need for an open torch flame which creates a safer work area for the operator.

EASIER TO OPERATE

- Ergonomic adjustable handlebars allow for a compact footprint during transportation and a raised position during operation.
- **RynoLink Castor Assemblies** allow for multiple units to be connected together and controlled by a single operator on larger work areas.

R2

- 24"x24" heating area

STATIONARY MELTER KETTLES

LEARN MORE

RY30MK-PRO

The RY30MK-PRO is the world's first 30-gallon Direct Fired Crack Fill Melter Kettle featuring dual internal burners. This kettle is designed to be free standing, or optionally bolted to any truck, or trailer. Its heavy-duty molasses valve allows you to control the flow of material into any pour-pot, or bander.

RY10MK-PRO

The RY10MK-PRO is a portable Crack Fill Kettle designed to be free standing or optionally bolted to any truck or trailer. Its heavy-duty molasses valve allows you to control the flow of material into any pour-pot or bander.

FEATURES & BENEFITS

PRODUCTIVE

- Melts crack sealant up to 50% faster than torch-fired models.
- The sealed burner(s) consumes nearly 50% less fuel than traditional torch-fired melter applicators.

RELIABLE

- The patented sealed burner is shielded from the elements and virtually eliminates flame-outs by wind, which are common to torch-fired models.
- The unique glycerin-filled thermometer is highly resistant to damage caused by constant vibrations during regular use, which ensures a reliable temperature reading every time.

EASIER TO OPERATE

- No more wasting time searching for a striker, lighter or matches. Starting a melter has never been easier with our push button electric ignition.
- Molasses valve for conveniently and quickly dispensing melted crack fill.

SAFETY BUILT-IN

- Kettle is equipped with latches, which help keep your lid securely fastened while moving from job to job.
- The unique sealed burner is equipped with a CSA / UL approved flame-out sensor which detects flame-outs and prevents fuel from flowing to the burner.

MASTIC APPLICATOR

LEARN MORE

RY10MS

The RY10MS was designed to load, dispense and maintain hot material directly from skid mounted or trailer mastic kettles. A slanted, ultra-low-profile design allows you to confidently load mastic material from either the front or right side of the kettle. Material flow is carefully controlled through a large, rectangular gate valve which places hot material near the centre of an easy-to-swap ultra-heavy duty 8" square steel shoe.

FEATURES & BENEFITS

PRODUCTIVE

- Load, transport and apply thousands of pounds of mastic material per day into all types of cracks, seams, joints, or potholes.
- Maintain and clean gate valve and chute with an included, handlebar mounted clean-out tool.

RELIABLE

- Large solid-steel wheels equipped with ball-bearings along with dual heavy-duty front castors make maneuvering and filling seams, cracks, or potholes a breeze.
- A rigid 14 gauge powder coated kettle easily keeps material at the application temperature, regardless of climate.

EASIER TO OPERATE

- The on-the-fly valve control paired with the easy-swappable steel shoe enables effortless dispensing and optional spreading of material.
- Handlebar mounted shoe control allows you to lower the shoe during application or keep it raised during transportation.

SAFETY BUILT-IN

- Handle mounted controls keep the operator further from the hot kettle during operation.
- A slanted kettle promotes loading from the front of the machine, allowing for safer loading and assisting material flow.

HEDGEHOG LAWN EDGER & CRACK CLEANER

LEARN MORE

RA-EDG-0006 HEDGEHOG LAWN EDGER & CRACK CLEANER

An indispensable tool for asphalt maintenance or landscaping professionals: The HedgeHog Lawn Edger & Crack Cleaner effortlessly removes vegetation and debris from cracks in preparation for filling and sealing, or for edging around driveways, sidewalks, and flower beds. The 6.5 hp/ 8.8 ft-lbs engine offers plenty of power, and the large fuel tank means less down time. Adjustable depth, cutting angles, and curb-hopping wheels make it easy to navigate uneven or off-angle pavement, raised curbs and irregular lawn surfaces. Easily clean or edge 20-60 linear feet every minute. Get more done, in less time with the RC-EDG-0006 HedgeHog Lawn Edger & Crack Cleaner powered by RynoWorx®.

Hedgehog Tools

POWERED BY

FEATURES & BENEFITS

PRODUCTIVE

- 8" twisted steel brush cleans between 20' to 60' of cracks per minute
- Large fuel tank reduces refueling down-time
- Adjustable depth and cutting angles
- Adjustable curb-hopping wheel

RELIABLE

- Long-lasting and dependable 6.5 Hp 4-stroke engine
- 90 day commercial-use manufacturer's warranty

EASIER TO OPERATE

- Ergonomic starter, depth control, and engine kill switch
- Simple wheel height adjustments
- Quickly change between lawn edging and crack cleaning
- Uses standard HedgeHog wire wheels

SAFETY BUILT-IN

- Automatic handle-bar-mounted kill switch for added safety and fuel savings unit is unattended
- Integrated blade guard
- 4-wheel design for improved stability

MINI ASPHALT RECYCLER

LEARN MORE

MINI ASPHALT RECYCLER

The Asphalt Mini Recycler provides an inexpensive way for heating low volumes of asphalt bricks and chunks for filling potholes. This innovative device equips contractors with the perfect solution to swiftly acquire hot asphalt on demand, regardless of location. The small but mighty Asphalt Mini Recycler exhibits impressive hot mix production rates up to 1/2 ton of asphalt during an 8-hour shift at temperatures below -15°C (5°F). Moreover, this exceptional equipment efficiently aids in filling potholes, ensuring seamless road maintenance.

FEATURES & BENEFITS

- **50,000 BTU Infrared Heater** – ensure the secure reheating of your asphalt bricks or previously used asphalt to create recycled HMA.
- **Venturi** – eliminate the need for batteries and blowers, reducing the risk of malfunctions and minimizing maintenance requirements.
- **Regulator** – Modify your pressures to suit the specific conditions of the job site.
- **Thermocouple / Basso Valve** – Incorporate a safety mechanism that detects the heat signature emitted by the infrared heater. If no signature is detected, the gas supply automatically shuts off.
- **Loading/Unloading Doors** – easy to load and unload.
- **Insulated Walls** – aid in preserving the asphalt at the desired temperature typically maintained at the plant.

PRODUCTIVITY

- Ideal for heating asphalt bricks and chunks
- Recycles up to 1/2 tons of asphalt in an 8 hour day
- Operates with 1 x 40 lbs. LPG tank
- Keep hot mix warm for up to 48 hours

ENVIRONMENT

- 100% Recycling means less waste to landfills
- No diesel only clean burning propane
- Reduce CO₂ output by 50% or more

CENTRIFUGAL SPRAY SYSTEMS

Experience safety, reliability, and efficiency with our cutting-edge centrifugal spray systems. Precision-engineered for superior performance and optimal material distribution, they're a must-have for contractors. Our systems blend innovation and functionality, meeting modern demands.
